National awards presented to Cornell soil scientists

The tri-societies, including the American Society of Agronomy (ASA), Soil Science Society of America (SSSA), and the Crop Science Society of America (CSSA) presented national awards at the national meetings in Long Beach, California in November 1-5, 2014. Several Cornell University faculty and students were among those recognized:

Johannes Lehmann, professor, received the International Soil Science Award and the SSSA Fellow Award

Thea Whitman, PhD graduate in Soil Science received the Francis and Evelyn Clark Soil Biology Scholarship.

Fatma Rekik and Rongkui Han, undergraduate students in the Agricultural Sciences program, received Golden Opportunity Scholar awards.

Quirine Ketterings, professor in the Animal Science department, received an American Society of Agronomy Fellow award.

The tri-societies are a group of international scientific societies whose more than 6,000 members are dedicated to advancing the field of soil and crop science and fostering the transfer of knowledge and practices to sustain global soils and crops.
